Supply chain professionals weave together talents in many areas of logistics, transportation, marketing, finance, and more. And they must constantly keep skills sharp to handle the increasing complexity of supply chains. To help companies meet their need for skilled recruits and multi-talented employees, universities and professional associations have enhanced their curriculum, and offer a multi-patched quilt of undergraduate, graduate, and certificate programs specializing in logistics, supply chain, and transportation management. Some schools have also customized programs to fill specific company needs and skills gaps. Online or on-site degree programs are available so working professionals' overloaded schedules need not hem them in.

On the following pages, *IL* provides data from a selection of schools and associations that submitted information about their logistics, supply chain, and transportation education offerings. This *Supply Chain & Logistics Education Resource Guide* stitches together a vast array of education offerings.
