A Can-Do Logistics Leader

Nebraska

When it comes to logistics—or, for that matter, most areas of business life—Nebraska is in the driver’s seat.
To attract manufacturing, distribution, and warehousing businesses, states must offer at least four types of benefits – affordable, skilled labor; attractive, available land; reliable, low-cost utilities; and accessible, economically competitive transportation. Nebraska has them all, according to Larry Johnson, president of the Nebraska Trucking Association.

In addition to these advantages, Nebraska offers a prime geographic location. The state is located in the “middle of everywhere,” says Johnson, who notes that Interstate 80 – which runs west from Omaha to the Wyoming state border – is the busiest east-west commercial transportation corridor between New York and San Francisco. Seven north-south state or federal highways intersect the region.

“Nebraska is the epicenter for traffic moving between Mexico and Canada,” Johnson notes. “The number of Nebraska-based carriers and the state’s geographic location combine to create a steady balance of truck freight moving to, from, and through Nebraska. This allows freight rates to remain steady, without the seasonal and cyclical highs and lows of more congested hubs that distribution and warehousing projects have been drawn to in the past.”

ACCESSIBILITY COMES FIRST

For businesses located in Nebraska, accessibility is everything. “Geographically, Nebraska is center stage to both regional and national markets,” says Rick Nelsen, economic development manager for the Nebraska Public Power District (NPPD), the state’s largest electric utility, with chartered territory that includes all or parts of Nebraska’s 93 counties.

“Interstate 80 offers 482 miles of quick access to everywhere in the nation,” Nelsen says. “Through Nebraska’s roadways, goods delivered by truck reach more than 26 percent of the U.S. population in just one day. Within two days, that percentage increases to more than 90 percent.”

Nebraska offers plenty of truck capacity to make those trips. “More than 13,500 licensed motor carrier companies..."
Overcoming obstacles and making the right decisions for your future demands the confidence and tools essential to achieve success . . .

Empower yourself . . . by having a knowledgeable, experienced partner you can trust to safely implement the appropriate strategy designed specifically for your unique supply chain needs.

Access Roads
Goods shipped by truck from Nebraska can reach 26 percent of the U.S. population within one day, or 90 percent in two days.

Asia, and Australia, Werner maintains offices in Canada, Mexico, China, and Australia – but its global headquarters is in Omaha.

“Geographically, Nebraska is well-positioned at the crossroads of the United States,” says Derek Leathers, Werner’s president and COO. “The state also offers well-established highway and railroad infrastructure.”

Two of the nation’s leading rail companies – BNSF Railway Company and Union Pacific Railroad – provide service to many Nebraska communities. Ten freight railroads operate more than 3,200 miles of track throughout the state, and no major city in the United States is more than five days by rail from Nebraska.

IN GOOD COMPANY
Among the supply chain specialists situated for success in Nebraska is TSL Companies, an integrated, value-added, full-service logistics organization founded in 1981. TSL serves all domestic North American markets with intermodal contracts encompassing the Class I railroads and a network of contracted for-hire trucking companies.

TSL’s divisions include Transportation Specialists Ltd., which operates specialized tractor and chassis equipment for handling heavy commodities. In addition to its large intermodal fleet, Transportation Specialists operates a division providing dedicated routes and contract carrier transportation.

Other TSL divisions include TranSpec Leasing, TSL Terminals, International Logistics, and TSL Logistics Ltd., which offers domestic third-party logistics solutions. TSL Logistics has a coast-to-coast, border-to-border presence, and offers warehousing, transloading, and consolidation services. It contracts with all major railroads, steamship lines, brokers, and carriers.

TSL’s intermodal terminals in Omaha; Kansas City, Mo.; and Denver serve all the Plains states, making TSL the largest intermodal company between the Mississippi River and the Rocky Mountains in the upper 14 Plains states, according to Thomas Hastings, president of TSL Companies.

Also taking full advantage of its Nebraska location is Ford Storage & Moving Company, a diversified logistics provider of asset-based warehousing and transportation services. The Omaha-headquartered firm offers logistics, consolidation, home delivery, and relocation services. Its distribution centers are strategically located in Omaha and Kansas City, Kansas, to service domestic and global markets. Its customers represent manufacturing companies and distributors, as well as wholesale and retail-based industries.

GETTING DOWN TO BUSINESS
Being in the right place is one thing. But if the right place doesn’t offer an economic environment favorable to business, the advantage is lost. Helping forge a strong partnership between Nebraska’s logistics sector and government is the Nebraska Logistics Council, which works in cooperation with the Nebraska Trucking Association and the state’s Department of Economic Development.

The council focuses on promoting growth in the logistics sector, and works closely with prospective companies to model their logistics costs across all transportation modes, giving them an estimate of Nebraska’s labor, land, utilities, and logistics cost advantages.

Nebraska distinguishes itself by the strength of its partnerships between workers and companies, and companies and government, says Robert Winter, Nebraska Trucking Association board member, and
In the center of the NAFTA transportation corridor
Reaches 26% of the U.S. population in one day; 90% in two days
Operates 2 foreign trade zones
482 miles of Interstate 80
9,980 miles of interstate, freeway and arterial roads
Two Class 1 railways serve more than 4,000 miles of track
10 airports with commercial airline service to major hubs
10 Missouri River ports

SPEED TO MARKETS WITH MINIMAL CONGESTION

“Public power also means Nebraska’s utilities are financed, in part, through issuing and selling tax-exempt revenue bonds, resulting in lower interest rates on borrowed money,” Nelsen adds. “The publicly elected board that serves as NPPD’s decision- and rate-making body allows it to move more quickly than other utilities on key issues.”

It comes down to making business work for everyone at all levels. “Workers in Nebraska possess a strong work ethic,” says Leathers. “And the regulatory and government environment is very pro-business. That helps explain why the state’s unemployment rate never rose above six percent during the recent recession.”

AN EMPHASIS ON GROWTH

Because sitting still—even when that means sitting pretty—is not enough, Nebraska’s leaders are intent on preparing tomorrow’s workforce today.

“Nebraska maintains high-quality, respected public and private commercial driver’s license (CDL) training programs to stay ahead of the demand for truck drivers,” he adds. “Six CDL programs operate on university and community college campuses across the state—including one on the University of Nebraska at Kearney’s campus in its Ag Transportation Safety Center.

“Diesel technician training programs exist on various community college campuses across the state,” he adds. “Thanks to the growth of the Transportation, Distribution, Warehousing, and Logistics (TDWL) career path, all the diesel programs are currently filled and wait-listed.”

The TDWL field is forecast as one of the top two industries in the state for business investment and job growth for the next 10 years, according to a study commissioned by the Nebraska Department of Labor and Economic Development, and conducted by Battelle, an Ohio-based global research and development organization.

The leading advantages of conducting business in Nebraska, as noted by industry leaders in Battelle’s interviews, are workforce quality; business-friendly

environment; central location with good transportation network; proximity to raw materials and customers; and family-friendly, low-crime neighborhoods.

Together, these assets create a powerful magnet for business. Incentives strengthen the attraction.

The Nebraska Advantage Act fuels job growth through incentives for investment and job creation, focusing on small business, rural development, research and development, and a microenterprise tax credit advantage. Additional development assistance programs include tax increment financing, community development block grants, customized job training programs, and industrial revenue bonds.

Leathers is optimistic about the U.S. logistics sector’s growth prospects. And he believes Werner – and, by extension, Nebraska – will particularly reap the benefits.

“The U.S. retail industry reports its lowest inventory levels in history,” he explains, noting that it is a smart economic decision for retailers to keep inventory levels low and move products quickly. “And, as a percentage of total job growth, logistics will be a leader.”

Among the markets set to prosper from this growth are Nebraska’s can-do business and logistics sectors.
