About the Top 100 3PL Providers List

When we started researching the 3PL sector in 1996, our goal then was the same as it is today: to help our audience find the logistics partners that best match their needs.

Back then, we asked logistics providers to supply data on services, solutions, technology investments, geographic coverage, and financial stability. The edit team gathered much of that information by phone and followed up with a fax questionnaire.

These days, to get the information you need on partners that make the best fit, we use a web form. The questions we ask have grown over the years and have been determined by two factors: input from customers seeking a 3PL partnership and specific solutions they require, and the evolution of the types of services that best-in-class 3PLs offer.

The 3PL selection team evaluates the data that 3PLs report with an eye toward matching the size, solutions, and culture of a logistics provider to our understanding of what our audience requires. The list is based not on the 3PL’s size, but on specialty services and solutions, types of customers, corporate culture and, importantly, flexibility—the ability to help you solve the challenges unique to your operation.

The number of 3PLs offering qualified submissions exceeded 300 this year. Those selected come from a diverse mix of company types that are now offering 3PL solutions—warehouse operators, expediters, roll-ups, truck leasing companies, technology, finance, brokers, carriers, and freight forwarders.
